The Prime Minister's Council on Climate Change has approved in principle the National Mission on Enhanced Energy Efficiency. In a statement, the Prime Minister said that the Mission will enable about Rs. 75,000 crore (approx $15.6 billion) worth of transactions in energy efficiency and will help to save about 5% of India's annual energy consumption, and nearly 100 million tonnes of carbon dioxide every year by 2015.

The most innovative and challenging new initiative to be introduced under the Mission is the "Perform, Achieve and Trade" mechanism which would assign energy efficiency improvement targets to the country's most energy-intensive industrial units, with the provision of allowing them to retain any efficiency improvements in excess of their target in the form of Energy Savings Certificates, called ESCerts. Units will also be allowed to use ESCerts which they have purchased to meet their targets. The other major goal of the Mission is the promotion of Energy Service Company (ESCO) based upgrades to energy efficiency in buildings, municipalities and agricultural pumpsets.

The Government of India has unveiled the Foreign Trade Policy for 2009-2014 which has set the target to achieve an annual export growth of 15% over 2010-11 with an annual export target of US$ 200 billion by March 2011 and aiming to double India's exports of goods and services by 2014. The highlights of the policy include higher support for market and product diversification, export promotion credit guarantee scheme at zero duty, extension of duty entitlement passbook scheme till December, 2010 and several sector specific measures.
