**Policy Developments**

- The Securities and Exchange Board of India (SEBI) has decided to double the open position limit in exchange-traded currency derivatives. It has increased the gross open position of banks across all contracts up to 6 per cent of the total open interest or $10 million, whichever is higher. At present, there is a limit of 6 per cent of the total open interest or $5 million. For non-bank trading members, the limits have been enhanced to 15 per cent of the total open interest or $50 million, whichever is higher, from 15 per cent or $25 million earlier. More

- The Reserve Bank of India (RBI) has decided to extend the date for completion of the procedure for buyback of foreign currency convertible bonds (FCCBs) from March 31, 2009 to December 31, 2009. The RBI has said that it would consider proposals from Indian companies for buyback of FCCBs under the approval route, provided the buyback value of the FCCB was at a minimum discount of 25% on the book value. The funds used for the buyback would also have to be out of internal accruals and the total amount of buyback should not exceed $ 50 million of the redemption value, per company. More

- The Derivatives Market Review Committee appointed by SEBI has recommended various measures to provide world class standards to Indian stock exchanges. The important measures include physical settlement of derivative contract first in options and then in futures segment, revision in eligibility criteria for introduction of Futures and Options on stocks and indexes, upward revision of position limits, revisiting Securities Transaction Tax (STT), etc. More

- The Reserve Bank of India (RBI) has decided to allow Indian companies to hedge carbon credits and freight contracts on overseas exchanges. Indian companies can hedge their exposure in the local physical market at overseas exchanges. More

**Economic News**

- India’s total external debt stock is placed at US$ 230.85 billion at end-December 2008 as against US $224.65 billion at end-September 2008, recording an increase of US$ 6.2 billion or 2.8 per cent over the end-September 2008 level. - India’s net external commercial borrowings (ECBs) inflow slowed down to US$ 7.1 billion in April-Dec 2008 (US$ 17.4 billion in April-Dec 2007) mainly due to tight liquidity conditions in the overseas markets. More

- India’s financial sector is generally sound, resilient and fairly liquid and the financial infrastructure robust, according to the report of the Committee on Financial Sector Assessment. The concerns pointed out by the report include corporate governance in the co-operative sector, funding constraints of Non-Banking Finance Companies and the lack of up-to-date data to gauge household indebtedness. The self assessment has been motivated by the desire to ensure compatibility of the Indian financial sector with international standards and assess its overall stability. More
