**Policy Developments**

Reserve Bank of India (RBI) has decided to liberalize the external commercial borrowing (ECB) policy by allowing designated authorized dealer category-I (AD) banks to approve changes in the drawdown/repayment schedule of ECBs already availed both under the automatic and the approval route, subject to the condition that the average maturity period is maintained. However, any rollover in the repayment on expiry of the original maturity of the ECB would require prior approval of RBI.

The Securities and Exchange Board of India has modified provisions related to valuation of debt and money market instruments. SEBI has said that all money market and debt securities, including floating rate securities, with residual maturity of up to 91 days or over 91 days, would have to be valued at the weighted average price at which they are traded on the particular valuation day.

RBI has decided to withdraw, with immediate effect, the facility of short-term foreign currency borrowings provided to Systemically Important Non-Deposit Taking Non-Banking Finance Companies (NBFC-ND-SI) and the Housing Finance Companies. The decision has been taken after a review of the prevailing macroeconomic conditions and improvements in the domestic credit and liquidity conditions. RBI had, as a temporary measure, allowed NBFCs-ND-SI and Housing Finance Companies to raise short-term foreign currency borrowings not exceeding 50 per cent of the Net Owned Funds or $10 million, whichever was higher, for refinancing their short-term liabilities.

RBI has decided to introduce a fourth category of NBFCs which will be known as "Infrastructure Finance Companies" (IFCs). An IFC is defined as non deposit taking NBFC that fulfills certain criteria such as a minimum of 75 per cent of its total assets should be deployed in infrastructure loans, net owned funds of Rs 300 crore ($65 million) or above and a capital adequacy ratio of 15%.
